## Terms and Conditions

### IV. Contract conditions

20. To receive an award, finalists must provide the software to the public under an open source license, with minimum rights provided to the public equal to a GNU General Public License, whereby the finalist makes the submitted work publicly available under a license that allows the software and source code to be freely used, copied, and shared, and for any derivative works to be freely used, copied, and shared, without charge and with proper attribution. WV, USAID, and the Australian Government each receive a royalty-free, nonexclusive, and irrevocable right to reproduce, publish, or otherwise use the submitted work for Federal purposes, and to authorize others to do so. Under the Federal purposes rights granted by the finalists, USAID intends to provide the submitted work, including the source code to the public free of charge.
  - a. Finalists must provide all source code, necessary libraries, and associated documentation.

---

<sup>1</sup> Availability as a web application remains a **desired, but non-essential** functionality.
