

Judging Criteria 2012 – MMCC 2040 Prize

Sustainability (score times 4)

- To what extent are water and energy consumption at sustainable levels?
- How well are waste flows recycled or converted to provide energy or material value?
- To what extent is low energy, low waste transportation facilitated?
- How well are indoor and outdoor pollutants and GHGs minimized?

Restorative (score times 2)

- To what extent does is natural habitat restored?
- To what extent is ecological water flow accomplished?

Implementation (score times 3)

- Is implementation possible with existing technology?
- Are costs reasonable?
- Is the design feasible in our severe climate?

Integration (score times 1)

- How well are the innovations interconnected and integrated into neighbourhood design?
